basic: copy [x.zip] to /User/name/.minecraft/bin/mods/x.zip and set start in the advanced options of the launcher hellosx x.x.x.x map; x sources; This is what I did to get minecraft to work after installing the first version in wine (working fine): Install the addon in wine by copying the zip file into the mods folder Change the startup directory to a folder in your Home folder (example: ~/minecraft/Users/ID/AppData/Roaming/), where ID is the Windows username. Change the setting for the launcher to start in this folder Start Minecraft, Minecraft will automatically look for the files in the folder you set Choose a different folder to set as the startup folder Move your copied files into the same folder as the installed Minecraft file, but leave the launcher file where it was Start Minecraft Start Minecraft will automatically look for the files in the folder you set This worked perfectly for me :) Change the
