There is a political catchphrase that I've always wanted to see applied in my personal life: "I'm not bitter, I'm grateful." This is a phrase that has been applied to a wide array of topics in people's daily lives. It means you don't have to be bitter about the situation in which you find yourself, you are grateful that you don't have the situation in which the other person found themselves. For example, what if your first interaction with someone was that they punched you in the face for no apparent reason, you would be grateful that you were not in that person's shoes. Now I don't believe that most people will ever think of this sort of thing, but I've been guilty of this on occasion. Take the time this year to develop gratitude for what you do have and your current circumstances. It's the easiest way to curb your passive-aggressive attitude, and it will certainly help you focus on the positive things in your life. Tell me in the comments: how do you deal with the situation when your ex still harbors ill will towards you?

This invention relates to a method for ensuring proper attachment of parts of a prosthetic heart valve. More particularly, this invention relates to a method of attachment wherein a core is used to keep the parts of the valve in a fixed position while the valve is being implanted in a patient. For many years, replacement of a defective heart valve with a prosthetic valve has been a preferred treatment. One such valve is described in U.S. Pat. No. 4,106,129, which issued to Carpentier on Aug. 8, 1978. This valve is characterized by a ring which is securely attached to the open end of an annular septum. The ring is slidable along the septum and is firmly held in place by a core which is frictionally engaged within the interior of the ring. This arrangement has been found

I have successfully copied videos from android to the same device and from that to the pc, but I want to create a program that will work like a bluetooth transfer that is file I'm trying to make a program that will take my android device with me, transfer a file to the device, then the file will have a bookmark, and can be played on my pc, if i want to transfer a video file, how can i do that? I need a solution to a specific problem, I am creating an app that has multiple pages, and on the first page the user enters his email address and mobile number. Then he is taken to a page that has a list of up to 3 numbers which he can select and for each number there is a video which has been selected by the user. How can I show on the first page which numbers have been selected, so that the user can get to the second page? I've created the code for the first page but I dont know how to set the second page to use those values. Can someone help me?
